thyssenkrupp Industrial Solutions exhibits at Coal Africa 2017

thyssenkrupp Industrial Solutions exhibited at this year's Coal 2017 in Mpumalanga which took place from 22-24 August at the Graceland Hotel Casino and Country Club in Secunda.

The company's participation in the event was a resounding success; strategic discussions took place with potential and existing customers, new contacts were forged, business relationships were strengthened and thyssenkrupp's turnkey engineering, project management, system integration and after-market service capabilities in the fields of coal preparation and processing were unpacked.

This biennial, coal-processing, conference-led exhibition is a very niche orientated, coal related conference at which suppliers to the industry display their wares to technocrats within the SA coal processing industry.

"We were in good company with other major players in the field of coal-processing such as Multotec, Metso, DRA and many more also present," says Barend van Wyk at thyssenkrupp Service Centre.

thyssenkrupp extended an invitation to key customers in the Mpumalanga area to visit their stand where the focus was primarily on the capabilities of the Service Centre as well as on Industrial Radar technology.

"Our stand was packed with people inquiring about our company and we made contact with companies like Komatsu Mining, Anglo American Operations, HATCH to name but a few," comments Van Wyk.

Following a highly successful exhibition, thyssenkrupp confirms plans to participate in Coal Africa 2019 with an increased footprint to showcase the company's full basket of turnkey product, system and technology solutions.

About us:

The Industrial Solutions business area of thyssenkrupp is a leading partner for the engineering, construction and service of industrial plants and systems. Based on more than 200 years of experience we supply tailored, turnkey plants and components for customers in the chemical, fertilizer, cement, mining and steel industries. As a system partner to the automotive, aerospace and naval sectors we develop highly specialized solutions to meet the individual requirements of our customers. Around 19,000 employees at over 70 locations form a global network with a technology portfolio that guarantees maximum productivity and cost-efficiency.
